GreenCoat PLX
– "THE ROOFER’S CHOICE"

GreenCoat PLX Pro BT color coated steels
– high level of durability and sustainability for standing seam systems.
GreenCoat PLX color coated steel products from SSAB were developed together with Swedish tinsmiths and have become “The Roofer’s Choice”. They are tailor-made products for tinsmith applications, made from top Nordic quality steel, have environmental benefits and are highly durable. GreenCoat PLX products come with a 50-year technical guarantee and a 20-year aesthetical guarantee.

SSAB realizes the growing demand for sustainable building materials that offer enhanced performance.

GreenCoat PLX Pro BT

**High level of durability for standing seam systems**

GreenCoat PLX Pro BT is made from a multilayer system, e.g. a 350 g/m² layer of zinc and a 36 µm coating layer that provides protection from corrosion. These ensure less maintenance and a longer product life in the harshest weather conditions. GreenCoat PLX Pro BT comes with a technical guarantee of 50 years and an aesthetical coating guarantee of 20 years.

**50-YEAR TECHNICAL GUARANTEE (cost-efficient due to longer product life)**

GreenCoat PLX Pro BT is better suited than any other material for bold and permanent roofing and façade designs, based on standing seam systems. It offers a high level of durability for long strip roofing and is highly resistant to corrosion (RC5), UV radiation (Ruv3) and scratches. GreenCoat PLX products offer the lowest thermal expansion of all metals, like zinc or aluminum, and prevent buckling and deformation for decades.

**EASY YEAR-ROUND INSTALLATION, EVEN AT -15 °C**

Thanks to this specially formable steel with no “spring back”, installers can fold or bend GreenCoat PLX Pro BT manually or with the help of machines, even at temperatures as low as -15°C, which many other metals do not offer. This allows for cost-efficient year-round installation.

GreenCoat PLX Pro BT can be soft-soldered exactly like zinc. After chemically removing the paint layer, apply flux and use 50/50 or 60/40 tins for soldering and simply repaint.

**HIGH AESTHETICS AND TOP QUALITY**

GreenCoat PLX Pro BT enables roofers and architects to create roofs and façades in complex shapes and designs. Apart from conventional standing seam techniques, it can also be applied in the design of fascias and gutters.

GreenCoat PLX Pro BT is available in a wide range of modern top quality colors and finishes, both regular gloss and matt, chosen by architects and builders.

GreenCoat PLX Pro BT is fire-rated (EN 13501-1) with A2 s1 d0.

**HIGHEST DURABILITY FOR ANY WEATHER**

GreenCoat PLX Pro BT color coated steel is made from a multilayer system, e.g. a 350 g/m² layer of zinc and a 36 µm coating layer that provides protection from corrosion. These ensure less maintenance and a longer product life in the harshest weather conditions. **GREENCOAT® – THE MOST SUSTAINABLE COLOR COATED STEEL ON THE MARKET**

Steel has the lowest percentage of embodied energy, or “grey energy”, at only 1.45 MJ/m². Apart from that, GreenCoat® color coated steels offer a coating with a substantial amount of Swedish rapeseed oil instead of fossil oils, making them a true Nordic product and the most sustainable color coated steel on the market.

In an effort to further increase the sustainability of our GreenCoat® products, SSAB’s first fossil-free steel will be available by 2026. Our steel production will emit water instead of CO₂, which will be unique to the market.

* Grey energy is the hidden energy associated with a product, meaning the total energy consumed throughout the product's life cycle from its production to its disposal.
A selection of GreenCoat PLX Pro BT colors. More colors/finishes are available. Contact us.
SSAB has manufactured products for the building industry for more than 50 years and is the pioneer and innovator of sustainable color coated steel products offering Swedish rapeseed oil in the coating. This unique, patented solution reduces the environmental footprint of GreenCoat® products significantly and makes the GreenCoat® color coated steel portfolio the market’s greenest offering for roofs, façades and rainwater systems.

SSAB is a Nordic and US-based steel company offering value added products and services developed in close cooperation with its customers to create a stronger, lighter and more sustainable world. SSAB has production facilities in Sweden, Finland and the US and employees in over 50 countries. www.ssab.com
