Choosing the right GreenCoat product is easy!

GreenCoat® is SSAB's brand for innovative, eco-conscious color coated steel solutions for the building industry. As the greenest and one of the most comprehensive offerings of high quality color coated steel for exterior building applications, GreenCoat products provide many distinct advantages.

All GreenCoat products are made with premium Nordic quality steel, with most featuring a Bio-based Technology (BT) coating

made with Swedish rapeseed oil, which is unique on the market. The patented BT coatings do not only offer environmental advantages, but also increased performance.

Below you can find the right GreenCoat product for your application. GreenCoat products are eco-conscious, UV-resistant (up to RUV4), energy efficient, scratch resistant, have good formability and offer color stability over the years.

Natura: These GreenCoat products offer a patented, Bio-based Technology (BT) coating made with Swedish rapeseed oil. The benefits are their proven high quality combined with a durable bio-based coating.

Energy Efficient: GreenCoat Cool provides you with an outer skin on your building that reflects solar radiation. Choose this when you have a building in need of cooling.

Outdoor durability: These GreenCoat products have our longest guarantees for outdoor durability. They are proven to withstand decades of harsh weather, even in the tough Nordic climate.

Color repeatability: Choose this product when you need special, tight color tolerances for your application. Modular roofing is a typical product application.

Enhanced formability: Products for skilled roofing craftsmen who demand material with high formability. The steels in these products have been developed together with tinsmiths and are formable by hand – even down to -15 °C.

Elemental: Rough Matt Polyester and Matt Polyester have attractive matt surfaces and good properties for roofing applications. Polyester is perfect for standard profiles.
