Strenx® 110 XF

General Product Description
Strenx® 110 XF cold forming steel is a thermomechanically rolled product with a minimum yield strength of 110 ksi. Strenx® 110 XF is a cold forming steel for light- and heavy transport solutions and components.

Available dimensions
Strenx® 110 XF is available in thicknesses of 0.079 - 0.393 inches (2-10 mm), and in widths up to 63 inches (1600 mm) as coil, slit coil and cut to length sheets in lengths up to 630 inches (16000 mm).

Mechanical Properties

<table>
<thead>
<tr>
<th>Yield strength $R_y$ Min ksi/MPa</th>
<th>Tensile strength $R_m$ Min ksi/MPa</th>
<th>Elongation $A_50$ Min %</th>
</tr>
</thead>
<tbody>
<tr>
<td>110/760</td>
<td>118/813</td>
<td>15</td>
</tr>
</tbody>
</table>

The mechanical properties are tested in the transverse direction.

Impact properties

<table>
<thead>
<tr>
<th>Temperature</th>
<th>Minimum energy for test on longitudinal Charpy V 10x10 mm test specimens (1) ft-lbs (J)</th>
</tr>
</thead>
<tbody>
<tr>
<td>-40°F (-40°C)</td>
<td>20 (27)</td>
</tr>
</tbody>
</table>

1) Impact testing according to EN ISO 148-1 is performed on thicknesses ≥ 0.236 inch (6.0mm). The specified minimum value corresponds to a full-size specimen.

Bending properties

<table>
<thead>
<tr>
<th>Thickness Range</th>
<th>Inner Bending Radius (radius of bend)</th>
</tr>
</thead>
<tbody>
<tr>
<td>$t &lt; 0.137$ inch</td>
<td>0.8 $x$ t</td>
</tr>
<tr>
<td>$0.137 \leq t \leq 0.236$ inch</td>
<td>1.2 $x$ t</td>
</tr>
<tr>
<td>$t &gt; 0.236$ inch</td>
<td>1.6 $x$ t</td>
</tr>
</tbody>
</table>

For both longitudinal and transverse direction.

Chemical Composition (ladle analysis)

<table>
<thead>
<tr>
<th>Element</th>

</tbody>
</table>

1) Strenx 110XF is available with different levels of Si: from max 0.03%, up to max 0.28%.

Max Si 0.03% is the standard version that is suitable for hot dip galvanizing with thin Zinc layers, and for products that will not be galvanized.

If the material is to be hot-dip galvanized and a thicker Zinc layer is requested, this must be specified at the time of order.

2) Sum of Nb, V and Ti = 0.22% max.
Tolerances

More details are given on www.ssab.com.

**Thickness**

Tolerances according to Strenx® Thickness Guarantees.
Strenx® Guarantees offer considerably narrower thickness tolerances compared to EN 10 051.

**Length and width**

Width and length tolerances according to SSAB standard.
The SSAB standard offer narrower width and length tolerances compared to EN 10 051.
Length tolerances only apply for cut to length sheets.

**Shape**

Tolerances according to EN 10 051.
Narrower tolerances according to the SSAB standard are available on request.

**Flatness**

Tolerances according to Strenx® Flatness Guarantees Class A.
Strenx® Flatness Guarantees offer narrower tolerances compared to EN 10 051.
Flatness guarantees only apply for cut to length sheets.

**Surface Properties**

According to EN 10 163-2 Class A, Subclass 3.

Delivery Conditions

Thermomechanically Rolled. Strenx® 110 XF is available in as rolled or pickled surface condition with mill or cut edge.

Fabrication and Other Recommendations

**Welding, bending and machining**

Strenx® 110 XF has good welding, cold forming and cutting performance. Strenx® 110 XF is a cold forming steel not suited for heat treatments at temperatures above 1080°F (580°C) since the material then may lose its guaranteed properties.

For information concerning fabrication, see SSAB’s brochures on www.ssab.com or consult Tech Support, techsupport@ssab.com.

Appropriate health and safety precautions must be taken when bending, welding, cutting, grinding or otherwise working on the product.

Contact and Information
